8	3D991	4	2,367	0.17 %
9	7D994	3	2,367	0.13 %
10	5D991	1	2,367	0.04 %

Notes:

Enter an ECCN number or a six, eight or ten digit Schedule B number to search on. The shorter the Schedule B number, the more returns you will get. The longer the number, the more accurate your results.

It is important to remember that this is actual historical data from US Census. It will not always be correct because exporters create this data themselves every time they create an export.

The results provide two benefits:

If a certain ECCN number returns a high percentage of hits, click on that number and read the ECCN text. It's a good starting point for your research.

ECCN research helps companies understand if their product is high/medium/low risk for export control.
