

Upcoming *FREE* Webinar Classification of Chemicals According to the Harmonized Tariff Classification Schedule

Thursday, October 8, 2015
2:00 - 3:30PM EDT

Hosted by Amber Road's

As you are aware, it can be extremely difficult to classify the chemicals described in Chapters 28 and 29 of the Harmonized Tariff Classification Schedule (HTSUS). Incorrect classifications can have a major impact on your business, so it's important to know exactly what to look for when classifying these substances.

During this webinar, Robert Schwartz, President and CEO of MyIslandBeach LLC, will provide you with:

- An overview of some fundamental differences between Chapters 28 and 29 and other portions of the Harmonized Tariff Schedule
- Key questions to ask chemists and tips for comprehending their responses
- An understanding of how functional properties, intended use, and chemical structure can influence the classification code

Join us for this in-depth session to ensure that you are classifying chemicals correctly and keeping your organization compliant.

Instructor:

Robert Schwartz
CEO
MyIslandBeach LLC

Dr. Schwartz is President and CEO of MyIslandBeach LLC, an organization that licenses an application for automatically assigning Harmonized Tariff Schedule Classifications to organic molecules for importation into the US and EU. Prior to MyIslandBeach, Dr. Schwartz worked at Merck for 27 years and contributed to the discovery of the life-saving antifungal agent Cancidastm, for which he shared the Heroes of Chemistry award in 2006. Dr. Schwartz was also in charge of the Merck's Compound Collection for several years.

Dr. Schwartz received a Bachelor's of Science Degree from Bradley University in Biology and a Ph.D. in Chemistry from the University of Hawaii.
