

Free, Educational Webcast:

Union Customs Code – Where Are We One Year Away From Implementation

Wednesday, April 8, 2015 at 2:00 p.m. / 9:00 a.m. EDT

Hosted by Integration Point & United Kingdom's HM Revenue & Customs

The Union Customs Code (UCC), adopted in 2013, is now one year away from being implemented. With this implementation on 1 June 2016, the UCC will be the legal framework for European Union (EU) Customs transactions for the next 20 years. What needs still to be completed before the 1 June 2016 deadline, and is your company prepared?

Join Integration Point and the United Kingdom's HM Revenue & Customs (HMRC) for a 90-minute educational webcast to understand where the UCC stands today, what is happening in general, and how your company can continue to prepare. The panel, team members of the HMRC UCC Negotiation Team, will cover the general updates of the UCC while diving in to more specifics on a variety of topics.

Topics that will be covered include:

- Timetable of Implementation and Transition Arrangements
- Authorised Economic Operator (AEO) Pros and Cons
- Special Procedures including Retail Sales in a Customs Warehouse
- Valuation Issues such as Royalties and Last Sales
- Centralised Clearance, SASP and Self-Assessment
- Guarantees & Temporary Storage

There will be a Q&A session following the webcast, as well as continued dialogue on the [Global Trade News blog](#).
