

Global Trade Compliance Agent-Growth Opportunity

What an incredible opportunity to make a significant and direct impact on our company's future success. As our Global Trade Compliance Agent at Panduit, you'll have the autonomy and support of upper management to participate, design and implement new strategies. It is a very exciting time as Panduit, a very sound and industry leading organization, is growing their global trade compliance organization. This is your chance to be part of that growth environment within a well-established global corporation and have a mentor who is well versed in the service, shipping and international side of global trade compliance. As you embark on your adventure with us, you will help the company to continue to move forward and contribute to the overall vision for this department. If you are currently pigeonholed in one area and ready to spread your wings and expand your global reach within international trade compliance for a single company, this is the right opportunity for you. Consider joining us and apply today.

As our Global Trade Compliance Agent, based in Tinley Park, IL, your primary responsibility will be to assist with project management and technical support activities in the development and implementation of policies and procedures related to international trade agreements, trade legislation, U.S. and foreign Customs regulations, and other government agency requirements affecting imports and exports, for purposes of assuring lawful and cost-effective import and export operations.

Responsibilities are but not limited to:

- Review HTS tariff classifications and participate with cross functional regional teams to optimize compliance and duty savings.
- Review processes and Customs entries for completeness and compliancy. Work with Customs to identify proper classifications through the Tariff Classification system
- Work in conjunction with divisional engineers and product teams to determine appropriate import tariff number and export classification and licensing determination.
- Implement approved free trade agreement opportunities with origin countries and determine compliant methods to save on importations and duty payments.
- Collaborate with forwarders and brokers to ensure that all export documentation is properly prepared and maintained.
- Engage with Customs on binding rulings for all questionable classifications
- Communicate updates concerning compliance risk areas, enforcement trends, existing laws, regulations, and new programs.
- Coordinate with Legal Department on investigations and disclosures of incidents of potential non-compliance or request for product information and product verification. Liaison with Customs for trade compliance and governmental inquiries.
