SUMMARY

A detailed-oriented analytical professional with a solid background in Import-Export, Supply Chain, Customer service, strategic planning, and Biomedical Engineering. An honest and tactful team player committed to achieving results that have a positive impact on the bottom line.

EDUCATION

Syracuse University, Syracuse, NY **2009 - 2013**
L.C. Smith College of Engineering and Computer Science
Bachelor of Science Graduate May 2013
Major: Bioengineering, Minor: Mathematics

TECHNICAL SKILLS

AutoCAD, Comsol, MATLAB, Java, Microsoft Word, Excel, Powerpoint, Autodesk Inventor

RELATED COURSEWORK

Statics	Mass & Energy Balances
Fluid Transport	Heat & Mass Transfer
Electric Engineering Fundamentals I	Electric Engineering Fundamentals II

SENIOR PROJECT

Cold Chain Synthesis - Developed a process for making dry ice from an available source of carbon dioxide intended for underdeveloped countries. The purpose for this process was to provide cold storage for transport of vaccines, blood samples or pharmaceuticals. By utilizing many different components the process theoretically addresses the cold storage problem.

AWARDS

Raymond von Dran Innovation and Disruptive Entrepreneurship Accelerator (IDEA) Competition

Dry Ice Synthesis for Developing Nations

Received a third place award in the in the category of Healthcare/Biotech. The product presented had the greatest potential impact on sustainability and the most creative.
