We have over 65,000 employees and a presence in virtually every country around the world to address some of the most challenging global health issues.

The Global Trade Analyst position supports the Global Trade Compliance function in maintaining BD's import and export requirements and controls. Demonstrate import and export technical knowledge including HTS and ECCN classification. They must apply this knowledge and use discretion to determine classifications for materials and maintain accurate master data in SAP GTS. The Global Trade Analyst must exhibit strong research and analytical skills, often being able to interpret import and export regulations and conclude how they apply to BD, making changes to internal procedures accordingly. Must also review current processes and procedures while thinking critically for process improvement opportunities.

### **Perform Sanctioned Party List:**

- Screening and analysis for customers, vendors, and transactional documents.
- Screen external business partners, reviewing and communicating results to the regions and escalating results when necessary to the Law Group.

**As a GTS Super-user, will manage global trade data and provide systems support and maintenance:**

- Support GTS master data activities to include classification of materials (HTS, ECCN) as well as data load support for critical integration projects.
- Update HTS and ECCN assignments in accordance with U.S. Customs changes.
- Manage data provider and work closely with IT to ensure U.S. Customs changes are uploaded into SAP GTS.

**Perform Free Trade Agreement analysis by analyzing BOM components to determine if materials qualify for FTA preferential duty status:**

- Understand, interpret, and apply FTA rules of origin.
- Conduct FTA determination/eligibility for internal and external customers.
- Perform material BOM analysis to qualify materials for FTA and execute FTA.
- Communicate with suppliers to request long term vendor declarations for externally procured materials.
- Perform financial savings analysis and communicate savings and opportunities to BD region.

**Review and analyze system blocked documents, adding material classifications or license information as necessary:**

- Maintain and validate license information for licensable shipments.

**Analyze large amounts of data and generate and report key GTC metrics including:**

- ACE reports
- Broker reports
- Forwarder AES reports
- BI Reports

**Actively contribute to BD's participation in CTPAT program:**

- Distribute and evaluate annual surveys to BD sites and external vendors
- Conduct risk assessments of import lanes
- Complete security profile in CTPAT portal
- Assist in preparation for CTPAT validations
