

IMPORT/EXPORT & TRADE COMPLIANCE MANAGER

The Import/Export and Trade Compliance Manager will lead global trade compliance for all Safran Aerosystems Services Americas products and services. The role serves as the trade compliance subject matter expert through the provision of a robust trade compliance system of procedures and documentation that meet the requirements of applicable laws, regulations, company policies and best practices. The individual will provide support and guidance to other Safran Aerosystems Services departments for import, export and trade activities as well as defining, development and deployment of related internal training requirements for staff. As a Quality Department team member the individual will assess regulatory and policy compliance and drive continual improvement through conducting internal audits of trade practices and effectiveness of related training programs.

DUTIES AND RESPONSIBILITIES

- Develop and support comprehensive risk-based export controls and audit procedures to ensure compliance with US regulations including the Export Administration (EAR) Regulations, the International Traffic in Arms (ITAR) Regulations, and the Office of Foreign Asset Control (OFAC) regulations and sanctions programs.
- Ensure appropriate licensing and export authorization of products and services.
- Determine the applicable of ITAR license / exemption, or the applicable ECCN license / exception.
- Ensure records are maintained and in compliance with all governing regulatory requirements and the activities demonstrate reasonable care.
- Provide direction on segregation and protection of controlled data.
- Proactively identify potential export, import and trade compliance risks and develop corrective actions and plans.
- Define and perform internal audits and provision of support for external audits.
- Develop and implement continuous improvement actions to address issues arising from investigations, disclosures, governmental/regulatory visits, audits and identified deficiencies.
- Development and deployment of mandatory training and assessing training effectiveness
- Establish containment actions in response to logistics and customs issues and escalates complex issues to management as appropriate.
- Liaise with internal and external parties regarding the classification of Safran products using the Harmonized Tariff Schedule (HTS) of the United States according to General Rules of Interpretation (GRI's), Binding Rulings, Explanatory Notes, Informed Compliance Publications, Reasonable Care Guides, and other established Customs information. Monitors and supply HTS, Schedule B, and ECCN documentation for any concerned shipments.
- Creates and maintains appropriate reporting to management. Provide specific analysis on import and export regulatory compliance and supply chain initiatives.
- Ensure and perform denied party screening for employees, visitors, customers, 3rd parties and suppliers and maintain corresponding records.
- Maintain relationships with the export/import and trade compliance contacts at global sites.

QUALIFICATION REQUIREMENTS**a) Knowledge and Skills**

- Full working knowledge in Foreign Trade and U.S. customs regulations, tariff codes, and understanding Foreign Trade agreements as it pertains to the business.
