Full Job Description

Bloom Energy is the leading force in transforming the way energy is generated and delivered. We are driving toward the parallel goals of growing a dynamic and forward-thinking company while creating a positive impact on our environment. Our mission is to make clean, reliable energy affordable globally. Our company is filled with smart and innovative thinkers and doers, and we never stop striving to improve our technology, to expand and improve our company performance, and to develop and support the many talented employees that serve our mission!

We are looking for a Logistics Analyst to join our team in one of today's most exciting technologies. This role will report to the Logistics Manager and will be based on site in Newark, DE.

Additional comments:

This position is responsible for supporting and continuous improvement of transportation and related logistics functions for Bloom Energy.

Encompassing a wide range of programs and services in support of Materials Management and Global Sourcing initiatives, the Logistics Analyst provides logistics solutions to Bloom manufacturing sites and our global supply chain. As a critical element of a synchronized supply chain, transportation and logistics must be focused on providing optimized in-transit inventory control at the lowest total landed cost.

The individual should have demonstrated problem solving experience in the aforementioned areas. The qualified candidate should have demonstrated excellent business instincts, the ability to work independently, set priorities, manage resources and close on deliverables.

Role and Responsibilities:

- **Deploy strategic transportation and logistics initiatives after complete evaluation of material flow and operational requirements and gathering direction from business leadership**
- **Analyze and maintain the relationship with Bloom Energy's Lead Logistics Providers globally**
- **Scheduling and coordinating the local materials delivery between Bloom energy sites utilizing Kanban and lean material concepts**
- **Develop, document, implement and improve logistics processes and procedures**
- **Perform/coordinate Supply chain/Logistics analysis and make recommendations to mgt for improvements**
- **Track transportation savings, ensuring attainment of all productivity and cost out objectives.**
- **Ensure effective and efficient operation and improvement of policies and practices**
- **Develop and maintain peer relationships in order to achieve Bloom Energy objectives and customer expectations.**
- **Interact with management and employees on matters pertaining to the shipment and delivery of related items.**
- **Train operational customers (internal & external) on transportation and logistics processes and initiatives to increase awareness and compliance.**

- **Coordinate logistics activities with Bloom Energy carriers to ensure timely and complete delivery and receipt of materials**

Skills and Experience:

- **BS/BA Degree in Supply Chain / Logistics / Business preferred**
- **Minimum 1- 3 year of relevant experience in logistics**
- **Oracle ERP experience preferred**
- **Some experience in international logistics (customs regimes, import/export, tax, contractual implications)**
- **Excellent communication and interpersonal skills**
- **Team-oriented, with proven ability to work cross-functionally**
- **Ability to make decisions quickly**
- **Good analytical skills**
- **Excellent PC/application skills MS Excel, MS Outlook, Power Point, Visio, etc.**
