

**General Information:**

**Job Title: Asian Pacific Export Compliance Analyst**  
**Veolia Water Technology & Solutions**

**Location: Singapore**

**Seniority level:** Associate

**Employment type:** Full-time

**Job function:** Sales, Business Development, and Customer Service

**Industries:** Chemical Manufacturing, Oil and Gas, and Environmental Services

**Job Summary about the area and the role:**

Veolia Water Technologies & Solutions (VWTS) is a worldwide leader in water recovery, treatment, and reuse. We design and supply a range of water systems, from food and beverage applications, to municipal water, to microelectronics ultrapure water and heavy industrial wastewater treatment. We serve more than 50,000 customers worldwide and treat more than 11 million cubic meters of water every day. We simply aim to be the benchmark company for ecological transformation across the world.

At WTS, we realize diverse teams make smarter decisions, deliver better results, and build stronger communities. We are an organization that champions diversity and inclusion at every rung of the ladder and are proud to be an equal opportunity workplace. We offer challenging and meaningful careers, with competitive benefits and flexible work arrangements.

**Summary of the Job**

In order to comply with Export Control Law, and requirements for Asia Pacific Dual Use Control, such as Singapore Strategic Goods (Control) Regulations and MOFCOM regulations, Veolia Water Technologies & Solutions Asia Pacific requires an Export Compliance Analyst to facilitate export control, export operation, & the license screening process.

The internal resource should have the ability to review transactions and understand the scope of products. The preferred function is Logistics.

## **Responsibilities**

- Pull list of active parts and the designated HS codes imported/exported from Asia Pacific sites to support export control tagging review against the applicable dual use control list
- Coordinate with HQ ITC, Project Management & Product Specialists to review list of active parts
- Receive VWTS ITC Focal training & MOFCOM training
- Coordinate with third party agency on MOFCOM regulatory updates from the Unreliable Entity List and the MOFCOM list
- Perform thorough, accurate and documented compliance reviews of export shipments
- Deliver license management for the Asia Pacific sites and support the application of export control licenses, as needed, for items that trigger a local export license
- Responsible to improve non-standard and standard export documentation and compliance screening for the different sites based on local regulatory requirements
- Participation in import export community meetings and activities where required and support service provider management in assigned countries
- Support the export control tagging management system
- Maintain the Tagging application (“smart tagging”) which supports the global business export control tagging process
- Execute reports from SAP to support tagging reviews and audits
- Identification & reporting of potential export control related process gaps and violations
- Help drive root cause analysis and corrective action identified during ITC audits
- Build an Internal Compliance Program process with product tagging and denied party screening for Asia Pacifica and & MOFCOM regulations

## **Qualifications for International Trade Compliance**

- Strong technical skills and experience with ECCN and HTS classification determination
- In-depth knowledge on import/export regulations and activities
- Prior experience with developing and implementing International Trade Compliance programs
- Experience with encryption technology and application to export controls preferred
- B.S or equivalent degree - Highly preferred
- Experienced working with a Global Trade System such as SAP GTS preferred
- At least 3-5 years of Global Trade related experience preferred
- Experience with global trusted trader programs such as AEO, CSA, NEEC or other similar programs a plus
- Must be able to work with multiple cross functional and cross geographical teams
